Goals and Objectives for Program Effectiveness (22.1a)

Goal 1: Individuals who complete the Purdue University ISPP will be prepared as competent entry-level dietitians

Objective 1: Over a 5-year period, individuals who have completed the ISPP will achieve an overall first-time pass rate on the RD registration exam of 80% or above

Goal 2: Interns will complete the Purdue University ISPP requirements within 1 year for full time supervised practice or within 2 years for part-time supervised practice

Objective 1: Over a 5-year period, 80% of the individuals will complete the ISPP requirements within 18 months (150% of the time planned) for full time supervised practice

Objective 2: Over a 5-year period, 80% of the individuals will complete the ISPP requirements within 36 months (150% of the time planned) for part-time supervised practice

Goal 3: Individuals who complete the Purdue University ISPP will gain employment in dietetics or related fields

Objective 1: Over a 5-year period, 80% of individuals will be employed in dietetics or related fields within 12 months of completing the ISPP

Goal 4: Individuals who complete the Purdue University ISPP will be prepared for professional leadership

Objective 1: Over a 5 year period, 100% of individuals who complete the ISPP will participate in a leadership activity at their place of employment or in the community (e.g. committee work, presentations)

Objective 2: Over a 5 year period, 50% of individuals who complete the ISPP will indicate active participation in the Academy of Nutrition and Dietetics beyond national and state membership (e.g. district membership, dietetic practice group membership, or elected or appointed office at the district, state or national levels)

Goal 5: Individuals who complete the Purdue University ISPP will be employed in a broad range of practice areas

Objective 1: Over a 5-year period, at least one individual who completed the ISPP will be employed in either Medical Nutrition Therapy, foodservice management, or community nutrition (i.e. at least one graduate will be represented in each of these areas)
Objective 2: Over a 5-year period, at least one individual who completed the ISPP will be employed in an area of dietetics practice other than Medical Nutrition Therapy, foodservice management, or community nutrition

Goal 6: Individuals who completed the Purdue University ISPP will be preceptors for dietetic interns

Objective 1: Over a 5-year period, 25% of individuals who completed the ISPP will serve as a preceptor for dietetic interns

Program Outcomes (22.1b)
The ISPP at Purdue University began in 2013, so limited outcomes data are available. Data are available by written request to Dr. Kathleen Hill Gallant at hillgallant@purdue.edu.
